

**Think KI.**

**10 favorite KI products for  
K-12 learning environments.**

# Knowledge + Involvement

Think about student and community engagement. Think KI.

Schools are evolving into epicenters for the community—from the student community to the families and neighborhoods that schools bring together. While students roam from classroom to STEAM space and cafeteria to media center throughout the day, many in the community also engage in school spaces for extracurricular activities, after-school programs, sporting events and the performing arts. As host to so many in the community, schools are a source of inspiration first for students and teachers as well as those in the supporting community.

# Knowledge + Inspiration

Think about what works. Think KI.

# 10 favorite KI products

Based on the most frequently ordered products, this past year underscored the importance that learning environments need to be adaptable, flexible and scalable. As you focus on navigating the challenges of teaching through diversity, here are the products that helped our K-12 clients this past year.

1 Ruckus® Collection

2 Intellect Wave® Collection

3 Pirouette® Tables

4 MyPlace™ Lounge Furniture

5 Uniframe® Tables

6 Strive® Seating Collection

7 Instruct® Teacher Desk

8 700 Series® Bookcases

9 Aristotle® Casegoods

10 Pillar® Tables

# Ruckus® Collection

The Ruckus Collection was designed for collaboration and comfort. The seating allows students to sit, perch or turn around to meet with other students, enabling the type of movement essential to cognitive development and learning. The lectern, seating and whiteboard options support the teacher as facilitator, increasing participation and engagement around the classroom. The ever-expanding collection also includes work tables and storage elements. Project-based learning, STEM, art, lab and CTE classes all greatly benefit from the flexibility, durability and cleanability of the Ruckus Collection.

# 2 Intellect Wave® Collection

The unique flexing back of Intellect Wave Seating provides exceptional comfort and permits a certain degree of movement to help foster attentiveness and learning retention. The sleek design with built-in handle makes it easy to move while the Intellect Wave Desks allow for easy use of technology. The collection offers options that promote group learning yet supports individual work or testing. Engineered to withstand tough classroom use, Intellect Wave seating offers years of low-maintenance ownership at a price point to fit any school's budget.

# 3 Pirouette® Tables

Reasonably priced for any school, Pirouette tables are the perfect combination of form and function. It's no wonder this table is ordered by virtually all our K-12 clients. With nine top shapes, the unique design allows Pirouette tables to be reconfigured to adapt to varied learning configurations. The pneumatic base is perfect for all learning styles, while the collaborative base allows students to comfortably fit around the table. Tiered options allow students to sit or stand and can transform a standard classroom into a lecture-type room. The table nests for simple storage, making it versatile for many different spaces from multi-purpose rooms to cafeterias. Power options available.

While the 60" rectangle is the most popular, Pirouette also offers a 30" version. The 30" version provides a way for classrooms to easily flex from group activity to individual workspace and back again.

# 4 MyPlace™ Lounge Furniture

The trend for comfortable, alternative learning spaces is quickly turning into a mainstay. With a robust variety of shapes, sizes and table options, MyPlace Lounge Furniture offers a versatile, functional space and an exceptional range of configurations. MyPlace elements are being specified in student-led classrooms and gathering places such as media/innovation centers, hallways and landings. Incorporating a high-back model can help with space delineation or provide privacy within an open space, perfect for adding booths to a cafeteria or break room.

# 5 Uniframe® Tables

With cafeterias often doubling as meeting spaces or performance venues, Uniframe Tables adjust to these multiple needs quickly, safely and easily. And the multitude of shapes, styles (including seating options) and heights allows today's cafeterias to be dynamic and a visual focal point for the school. Safety features make the tables effortless to fold/unfold and prevent unexpected folding and unwanted rolling or movement. The smaller frame stance makes it easy to clear doorways and requires less space to nest and store. Built to withstand heavy use, Uniframe Tables offer an industry-leading 15-year warranty and a great price point.

# 6 Strive® Seating Collection

The Strive Seating Collection offers a simple yet elegant seating solution for design continuity throughout a school. Its cleanability, affordability and versatility make it perfect for group tables in classrooms, third spaces, offices and cafeterias. The flex back encourages movement, relaxation and enhanced circulation, while the contoured seat dissipates pressure points for greater comfort. Most of the standard-size chairs stack for easy storage and movement, supporting multi-use spaces. With the great price point, it is a quintessential seating solution throughout school.

# 7 Instruct® Teacher Desk

Home base for our heroic teachers, these mobile desks provide integrated storage and plenty of surface space for lecturing, one-on-one instruction, use of audio/visual equipment and physical or digital grading. Instruct Teacher Desks can be modified to a teacher/school's needs and provide exceptional durability and flexibility for today's evolving learning environments, especially for grades 5 and up.

# 8 700 Series® Bookcases

Whether in a classroom, library, lab or staff office – storage is always needed. This locking storage bookcase is popular among K-12 teachers since storage space is always at a premium. 700 Series® Bookcases provide sizing, configuration and pricing options to fit any school. Sleek design and sturdy construction allow you to also use 700 Series bookcases in media/innovation centers or open areas to divide space and define learning areas.

# 9 Aristotle® Casegoods

Aristotle Casegoods provide a modern take on traditional furniture for district or school administrative spaces. A variety of modular pieces and ample storage options allow you to configure offices, workstations, conference rooms, reception stations and more. The price point provides a professional yet approachable overall look to any school office.

# 10 Pillar® Tables

With 10 standard top shapes, Pillar Tables offer endless configurations to support project-based learning, makerspaces and collaborative learning trends. The variety and functionality also make it a great table solution for cafeterias, classrooms, common areas, art rooms, STEM and other spaces that use creative curriculum. Pillar curve tables can be paired with MyPlace lounge furniture to easily create a comfortable and casual tiered environment.

# Knowledge + Innovation

Think outside the box. Think KI.

# INFINITY

FROM KI™

From computer labs to virtual gaming, we've seen unlimited innovations that enhance the learning experience. Sometimes these advances require modified or co-created furniture solutions to support. Infinity from KI is a proven way for KI to engage with you when standard furniture doesn't fulfill your needs. From custom materials and sizes to custom furniture designs, the Infinity from KI process can help provide students with the environment they need wherever learning takes place.

Address architectural issues and maximize the usable square footage of a space by designing custom table cutouts to wrap a column.

Bring your brand to life with school-specific graphics and colors.

Design custom furniture or accessories such as this table stand which allows students to easily toggle between private testing and open collaboration by inserting or removing markerboard dividers.
